## 3. Business performance for the first three quarters of fiscal 2008

During the first three quarters (April 1 to December 31) of fiscal 2008, the state of the Japanese economy took a marked turn for the worse, with declining corporate earnings and rising unemployment figures. This came about as a result of the global economic slowdown that was caused by financial market turmoil, which was in turn sparked by the U.S. subprime mortgage loan crisis.

Under these circumstances, the Group posted business results for the nine-month reporting period as follows: sales of $¥ 376,719$ million (up $1.6 \%$ over the same period of the previous fiscal term), operating income of $¥ 25,452$ million (down $16.6 \%$ ), recurring income of $¥ 25,255$ million (down $18.0 \%$ ), and net income of $¥ 13,441$ million (down $22.8 \%$ ). In spite of the increase in revenues, higher depreciation expenses resulting from changes in the useful lives of long-lived assets accompanying revisions to the taxation system, as well as the impact of foreign currency exchange adjustments, contributed to a year-on-year decline in earnings.

## (1) Breakdown of business performance by operational segment

## Gas Business

In the Gas Business, in spite of a decline in demand from the beginning of the third quarter among some of our customers, principally in the chemical industry, sales rose by $3.8 \%$ year-on-year, to $¥ 261,175$ million. However, operating income for this segment posted a year-onyear decline of $19.8 \%$ to $¥ 20,254$ million. This was caused by higher depreciation expenses resulting from changes in the useful lives of long-lived assets.

## The Machinery \& Equipment Business

In the Machinery \& Equipment Business, sales of air separation plants and equipment were at roughly the same level as for the corresponding period of the previous year, but revenue from the sale and installation of electronic equipment showed a year-on-year decline owing to a smaller number of large-scale projects compared with the previous year's first three quarters.

As a result, sales of the Machinery and Equipment segment posted a year-on-year fall of $4.8 \%$ to $¥ 101,045$ million, while operating income rose $17.9 \%$ to $¥ 8,470$ million.

## Housewares Business and Others

In the Housewares Business, sales of sports bottles and portable mugs were favorable, and sales in this segment rose $9.6 \%$ year-on-year to $¥ 14,498$ million, while operating income was up $38.1 \%$ at $¥ 1,951$ million.
(2) Breakdown of business performance by geographical segment

## Japan

Despite production cuts by customer industries in the gas business and growing curbs on plant and equipment investments, which had an adverse impact on the Company's performance for the third quarter, sales for the whole of the nine-month period edged up by $1.0 \%$ year-on-year, to $¥ 289,283$ million. Higher depreciation expenses resulting from changes in the useful lives of long-lived assets caused operating income to decline $15.8 \%$ to $¥ 18,986$ million.

## North America

In the reporting nine-month period, no substantial impact was registered from the slowdown of the American economy, and sales on a dollar basis posted a year-on-year increase. On a yen basis, however, sales declined $1.2 \%$ to $¥ 64,035$ million as a result of the yen’s sharp appreciation against the dollar. Operating income decreased $20.0 \%$ to $¥ 6,838$ million. This is primarily attributable to the posting of substantial losses as a result of the yen's appreciation. Changes in accounting standards for the amortization of goodwill, in line with new accounting procedures mandatorily applied to foreign subsidiaries, also caused expenses to increase.

## Other Regions

In Southeast Asia, our mainstay gas business showed a strong performance thanks to the expansion of production facilities in the previous term to meet the robust demand for industrial gases. As a result, sales increased $18.8 \%$ to $¥ 23,400$ million, while operating income rose $22.2 \%$ to $¥ 1,922$ million.
