#### 4. Explanation concerning the appropriate use of forecasts for business operations and other notable matters

The Taiyo Nippon Sanso Group has adopted International Financial Reporting Standards (IFRS) from the first quarter of the fiscal year ending March 31, 2017. In addition, the consolidated financial statements for the same period of the previous fiscal year and the previous fiscal year are presented based on IFRS.

This report contains business forecasts and other forward-looking statements that are based on information currently available to the Company and certain assumptions judged to be reasonable by management. The Company gives no assurances that business forecasts will be attained. Moreover, actual results may differ materially from business forecasts due to various factors.

#### 5. General information relating to the first quarter results

In the first quarter of the fiscal year under review (from April 1, 2016, to June 30, 2016), in the global economy, China's economic slowdown became more pronounced with uncertainties spreading to other neighboring countries in Asia. Meanwhile in the United States, the economy grew steadily, supported by firm personal consumption, even though there were concerns about the impact of economies in other parts of the world slowing. In Japan, although employment and income levels continue to improve, personal consumption showed sluggish growth. Compounded by the yen's appreciation since the beginning of the year and an uncertain outlook for the stock market, the Japanese economy has been treading water following a trend of improvement.

Against this backdrop, Taiyo Nippon Sanso Group (TNSC Group) achieved the following results for the first quarter of the fiscal year under review. Revenue on a consolidated basis decreased 5.2% year on year to \$133,436 million, operating income decreased 5.5% to \$12,328 million, and net income attributable to owners of the parent decreased by 15.2% to \$6,481 million.

The Taiyo Nippon Sanso Group has adopted International Financial Reporting Standards (IFRS) from the first quarter of the fiscal year ending March 31, 2017. In addition, the consolidated financial statements for the same period of the previous fiscal year and the previous fiscal year are presented based on IFRS.

A breakdown of business performance by reportable segment is as follows.

Segment income represents core operating income, which is calculated as operating income excluding certain gains or losses attributable to non-recurring factors (non-recurring items).

## Gas Business in Japan

In the industrial gas-related business, revenue from air separation gases (oxygen, nitrogen and argon), a core

product, declined year on year, mainly reflecting a decline in demand from the key industries of steel, and chemicals. However, gas equipment and air separation units posted revenue growth.

In the electronics-related field, revenue from equipment and installation work, including semiconductor manufacturing equipment, increased year on year, mainly owing to strong sales.

In the energy-related field, revenue from liquid petroleum gas (LPG) dropped substantially year on year due to a fall in the import price.

As a result, in the Gas Business in Japan, revenue decreased 3.3% year on year to \(\frac{1}{4}74,153\) million, while segment income rose 2.2% to \(\frac{1}{4}6,072\) million.

#### Gas Business in the United States

In the industrial gas-related business, shipments of bulk gas, primarily carbon dioxide gas, were strong, but sales of hard goods decreased significantly. In the electronics-related field, shipments of electronic materials gases increased slightly.

In addition, as a result of the yen's continued appreciation, there was a significant decrease in revenue due to the impact of foreign exchange translation.

As a result, in the Gas Business in the United States, revenue decreased 14.9% year on year to \$32,505 million, and segment income declined 17.1% to \$2,032 million.

#### Gas Business in Asia & Oceania

In the industrial gas-related business, sales trended favorably in the Philippines. Apart from that, the consolidation of Air Products Industry Co., Ltd. in Thailand and Renegade Gas Pty Ltd in Australia as subsidiaries of the Company in May and July 2015, respectively, contributed significantly to revenue growth.

In the electronics-related field, revenue from electronic materials gases and equipment in Taiwan, China, and South Korea was mostly unchanged year on year.

As a result of the above, in the Gas Business in Asia & Oceania, revenue increased 5.5% year on year to  $\frac{1}{2}$ 19,369 million, and segment income rose by 31.8% to  $\frac{1}{2}$ 1,250 million.

#### **THERMOS & Other Businesses**

In the THERMOS & Other Businesses, although demand from inbound tourists visiting Japan settled down, sales of new products were strong. Consequently, revenue was mostly unchanged year on year.

As a result, in THERMOS & Other Businesses, revenue decreased 1.1% year on year to \$7,408 million, and segment income rose 24.0% to \$2,928 million.

## 6. Segment information

TNSC Group conducts gas businesses in Japan and overseas, mainly for customers in the steel, chemical, and electronics industries, and it has built production and sales structures for its main products in Japan, the United States, and Asia & Oceania. In addition, the TNSC Group manufactures and sells housewares such as stainless steel vacuum bottles, and conducts real-estate rental and other businesses. Therefore, the Company has established the following four reportable segments: Gas Business in Japan, Gas Business in the US, Gas Business in Asia & Oceania, and THERMOS & Other Businesses.

The principal products and services included in the four segments are shown in the table below.

| Business segment               | Main products and services   |
|--------------------------------|--|
| Gas Business in Japan          | Oxygen, nitrogen, argon, carbon dioxide, helium, hydrogen, acetylene, gas- related   |
| Gas Business in the            | equipment, specialty gases (electronic materials gases, pure gases, etc.),   |
| United States                  | electronics-related equipment and installation, semiconductor manufacturing  |
| Gas Business in Asia & Oceania | equipment, cutting and welding equipment, welding materials, plants and machinery, liquid petroleum gas (LPG) and related equipment, medical-use gases (oxygen, nitrous oxide, etc.), medical equipment, stable isotopes |
| THERMOS & Other Businesses     | Housewares, real-estate rental   |

The accounting methods adopted for the reported operating segments are the same as the methods adopted to prepare the consolidated financial statements. Revenue from inter-segment transactions and transfers is based primarily on prevailing market prices.

| Total   | 78,695                      | 40,036                            | 19,084                         | 7,783                            | 145,600 | (4,854)                      | 140,746  |
| Segment income (Note 2)                                   | 5,940                       | 2,451                             | 948                            | 2,362                            | 11,703  | (475)                        | 11,227   |

#### Notes:

- 1. The ¥475 million negative adjustment for segment income is comprised of ¥41 million of intersegment eliminations and companywide expenses of ¥434 million that were not allocated to any particular reportable segment. These companywide expenses related principally to basic research expenses that were not allocated to a particular reportable segment.
- 2. Segment income represents core operating income, which is calculated as operating income excluding certain gains or losses attributable to non-recurring factors (non-recurring items).
